

Extract real-time signals from client conversations

Enterprise-level intelligence with LeapXpert Signals

Compliance

Regulatory & conduct risk

Cyber

Data & security threats

Business

Client & deal intelligence

LeapXpert Signals enables leaders to get a live view into company-wide client conversations by processing messages in real time to surface compliance signals, cyber alerts, and business insights - so every team can act on what matters, the moment it happens.

Benefits

1. Real-time visibility across compliance, cyber, and business

Consolidate messaging activity across departments and channels into structured, real-time insights that give leadership a clear view of client engagement across the organization.

2. The right signal for every decision

Extract compliance, cyber, business, and custom signals from conversations - so every team gets the intelligence it needs to act with confidence.

3. Turn insights into action, automatically

Convert signals into downstream workflows, escalations, and fast responses - so teams act on what matters without manual intervention.

Core capabilities

Signal coverage across every dimension

Three ready-to-use signal families - compliance, cyber, and business insights - each with pre-built presets for the scenarios that matter most, plus the flexibility to define your own.

Topic cloud & trends

Explore signal patterns through an interactive topic cloud and trend charts - with filters by channel, org unit, role, and time range for deeper analysis.

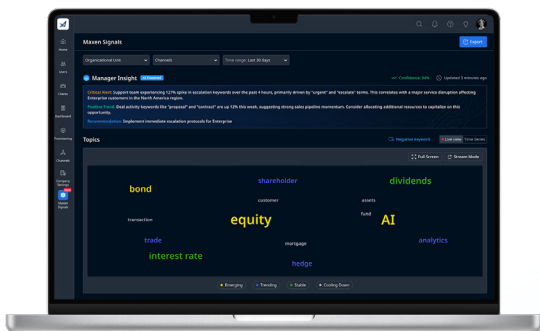

Governance, security & reporting

Strict entitlement-based controls ensure tenant-level governance and security, with PII redaction and a full audit log for compliance and reporting.

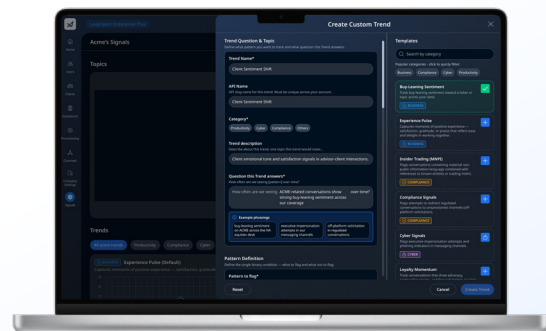

Act & automate without delay

Trigger workflows and actions automatically via APIs, webhooks, and emails - so teams respond the moment a signal fires.

Topic View

See what clients are talking about

Custom Signals

Track the signals that matter most

About LeapXpert

LeapXpert is the leader in Governed Communication Intelligence. The LeapXpert Communications Platform brings enterprise-grade governance to the consumer messaging channels employees and clients already use. Every conversation is captured, governed, and understood in real time, turning client interactions into intelligence the business can act on. Hundreds of the world's most demanding enterprises across financial services, government, and the Fortune 500, rely on LeapXpert daily.
